

ESG Management Practice Declaration

DY AUTO is committed to responsible management that leads innovation in the global automotive parts industry and contributes to a sustainable future. With our unique technological capabilities and a culture of collaboration, we will continue to strengthen environmental protection, social value creation, and transparent governance.

Environment

We prioritize eco-friendly management by reducing carbon emissions throughout our processes and maximizing resource efficiency. We aim to build sustainable manufacturing practices through energy saving and the development of green technologies.

Social

We pursue mutual growth with our partners, employees, and local communities, while fostering a culture of diversity and inclusion. By providing an ethical and safe work environment and expanding community engagement, we strive to create a better society.

Governance

We build trust with stakeholders through transparent and ethical management. To achieve this, we enhance our governance structure and strictly adhere to legal and ethical standards in line with global norms.

Through sustainable development and responsible management, DY AUTO will help shape a better world for future generations.
