

# Sustainable Development Goals (SDGs)

**Today, our planet faces growing environmental crises—including accelerated climate change, a surge in marine plastic pollution, and the collapse of ecosystems.**

In addition, a significant portion of the global population continues to suffer from poverty and disease, while the challenge of sustaining economic growth and social development remains.

In response to these challenges, the international community adopted the **17 Sustainable Development Goals (SDGs)**, which aim to achieve a sustainable future where current and future generations can coexist. These goals include ending poverty and hunger, responding to climate change, protecting the environment, developing innovative technologies, and promoting inclusive economic growth.

As a responsible member of the global community, **DY AUTO fully supports the SDGs proposed by the United Nations.** As a committed player in the automotive industry, we aim to create a sustainable future where humanity, the environment, and the economy thrive in harmony.

By aligning our business activities with the SDGs, we are actively engaged in the development of eco-friendly technologies, the creation of social value, and the establishment of a sustainable supply chain—leading the way in global ESG management.

DY AUTO will continue to rise to the challenge of building a sustainable future, fulfilling our responsibility through innovation and commitment to a better world.
